HEY THERE 👋

I'm Simone D'Amico, a Technical Team Leader

Over 15 years of creating large-scale software, I have become an experienced technical team leader. I am skilled in people management, team work coordination, operational excellence and development of staff. Additionally, my communication skills enable me to articulate product features and strategy. Finally, I am an advocate for Agile methodologies, DevOps culture as well as Lean principles.

I also run a newsletter named _Lead Through Mistakes_, where I focus on leadership and the common mistakes leaders make, sharing insights and experiences to help others grow and avoid pitfalls.

Serverless

EDUCATION

Università degli Studi dell'Aquila, L'Aquila
Bachelor in Computer Science
Graduated in 2010

LANGUAGES

Italian (native)
English (professional)

Redokun

TECHNICAL TEAM LEADER, PRODUCT TEAM   JAN 2025 - PRESENT

Leading a cross-functional team of 3+ people, overseeing planning, team delivery, and ensuring alignment with business objectives. Responsible for implementing best practices, optimizing development processes, and driving the evolution and maintenance of the platform to enhance scalability, performance, and reliability.

Spreaker / Triton Digital

TECHNICAL TEAM LEADER, PLATFORM TEAM   JAN 2022 - DIC 2024

Led a global, cross-functional team of 10+ professionals, driving strategic initiatives to enhance platform scalability and efficiency.

Designed and implemented roadmaps that streamlined complex challenges, aligning technical execution with business objectives. Strengthened stakeholder communication, ensuring alignment between technical capabilities and business priorities.

Fostered a culture of collaboration and innovation, improving cross-team synergy and accelerating project delivery.

Mentored team members, enhancing their professional growth and technical expertise, leading to increased retention and career advancement.

SOFTWARE ENGINEER, PLATFORM TEAM   APR 2020 - DIC 2021

Engineered scalable, high-performance solutions leveraging full-stack web development, database design, and API integration on a platform handling 100M+ daily requests.

Implemented best practices in software development, including code reviews, automated testing, monitoring, and observability, improving system reliability and maintainability.

Optimized backend and database performance, reducing latency and enhancing the responsiveness of critical platform services.

Ideato / Flowing

SOFTWARE ENGINEER   DIC 2013 - MAR 2020

Developed and maintained scalable applications. Designed and deployed serverless solutions on AWS, applying CQRS, Event Sourcing (ES), and Domain-Driven Design (DDD) to ensure maintainability and performance. Adopted Test-Driven Development (TDD) and software design best practices to improve code quality and system reliability.

Your Inspiration

TEAM LEADER   AUG 2012 - DIC 2013

Led a team of 6+ full-stack developers, delivering WordPress themes with 20K+ sales, ensuring performance, scalability, and user experience.
